Liquid Detergent for
Pots and Pans**

Cuts Grease

- Concentrated formula, highly effective
- Superior ability to cut the grease
- Extra cleansing foam with a sustained and high suds
- Soft on the hands
- Fresh citrus scent
- The dispenser reduces waste and controls costs

Liquid PanTastic

Concentrated formula with a capacity for higher grease cutting

A powerful combination of wetting agents and anionic surfactants and non-ionic, giving the liquid concentrate PanTastic superior capabilities to cut the grease and for lifting the dirt - even difficult baked on dirt. Cleaning pots and pans is easier ... saving time and money.

Long-lasting Suds

Liquid PanTastic is a heavy duty, phosphate-free, high sudsing detergent which gives an extra cleaning. The suds last, even in the presence of grease and other food particles.

Soft on the Hands

Liquid PanTastic is formulated to be tough on the food particles, but soft on the hands. The ingredients are pH balanced to make it soft, and the scent of fresh citrus makes PanTastic a pleasure to use.

The controlled dosing reduces costs

Ecolab offers a variety of concentrations and dosing options to help control the use of the product, to ensure the best results, and to manage the per-use cost. Your Ecolab representative will calibrate your dispenser to match the size of your sink, and the amount of food soils.

GENERAL USE INSTRUCTIONS

PREWASH AND SOAK—Use 1oz per 3 gallons of lukewarm water. Scrape food soils from pots and pans. Place the articles into the soaking solution, and let stand until the food soil has loosened.

WASHING POTS AND PANS—First sink, fill the sink with 1oz per 10 gallons, using hot water(110°F—120°F). Adjust the quantity of the product up or down according to the dirt load. Second sink—rinse the pots and pans in clean water. Remove and let excess water drain back into the sink. Third Sink—fill the sink with warm water (75°F—100°F). Use your sanitizer for a rinse, following the instructions on the label. After rinsing, remove, drain, and air dry. Do not dry with a cloth. Follow the regulations of the local health department for rinsing.

Consult your Ecolab representative for specific use instructions.
