

WINTERINSE

Removes Film On Floors And Carpets From Ice Melt Chemicals

DESCRIPTION

Just mop with WINTERINSE and your floors can be as beautiful in the winter as they are in the summer. WINTERINSE will eliminate the white film from ice melt chemicals that are deposited at entrance ways and can be tracked over other flooring and carpeting.

BENEFITS

FLOORS LOOK BETTER: Eliminates the white film from ice melt chemicals that deposit at entrance ways and tracks over other flooring and carpets.

FINISHES (AND FLOORS) LAST LONGER: Ice melt chemicals attack floor polishes to dull their gloss and necessitate premature stripping and recoating.

EASY TO USE: Just mop on and mop off. No need for scrubbing. Works like magic in one application.

SAVES LABOR: A few cents worth of Winterinse does the job better than many dollars worth of hard work.

REDUCES SLIP HAZARDS: Wet floors are more slippery... And floors covered with ice melt film stay wet longer because the compounds are hygroscopic and hold water.

HOW TO USE

FOR ROUTINE WINTER USE: Add one ounce to each gallon of rinse water.

TO REMOVE HEAVY FILM: Add two ounces to each gallon of rinse water.

FOR CARPETS: Dilute 2 oz. per gallon in a carpet extractor.

Apply mixed solution liberally and allow to soak a few minutes. Now wring out mop and pick up dissolved ice-melt.

SPECIFICATIONS

APPEARANCE.....	Yellow Green
ODOR.....	Evergreen
DENSITY.....	8.9 lbs/gal
BOILING POINT.....	200°F
pH AT USE DILUTIONS.....	11-12
FLASH POINT.....	None
STABILITY.....	2 Year minimum
USDA RATED.....	C1

PRODUCT CODE.....WIN
