

Spitfire Heavy Duty Power Cleaners have been reformulated

California Air and Resource Board (CARB) are tightening allowable levels of volatile organic compounds (VOC) in general purpose cleaners, general purpose degreasers and glass cleaners. Several formulas in the Diversey, Inc Building Care line have been reformulated to meet these new regulations. Power cleaners have required a full reformulation effort because a major component in the formulas needs to be changed.

Along with these changes, Diversey has simplified our Power Cleaner line by consolidating colors and scents of the formulas. See the key to the right.

This is to support our on-going efforts to be more sustainable and a better partner to our customers.

Butyl Cleaners

Non-Butyl Cleaners

Color Primary	
Red	Purple
Scent	
Fresh Pine	Citrus

4915	5890946	Spitfire Graffiti Remover	12 x 32 oz.

Key Points to Remember:

- ▶ The performance of all of the products was maintained as assessed using a modified ASTM 4488-A6 cleaning test (Standard US Testing.) See Figure 1 and 2 on the following page.
- ▶ Label colors are NOT changing. A bigger ,strategic project is underway to revamp all label colors for every product within the Building Care portfolio

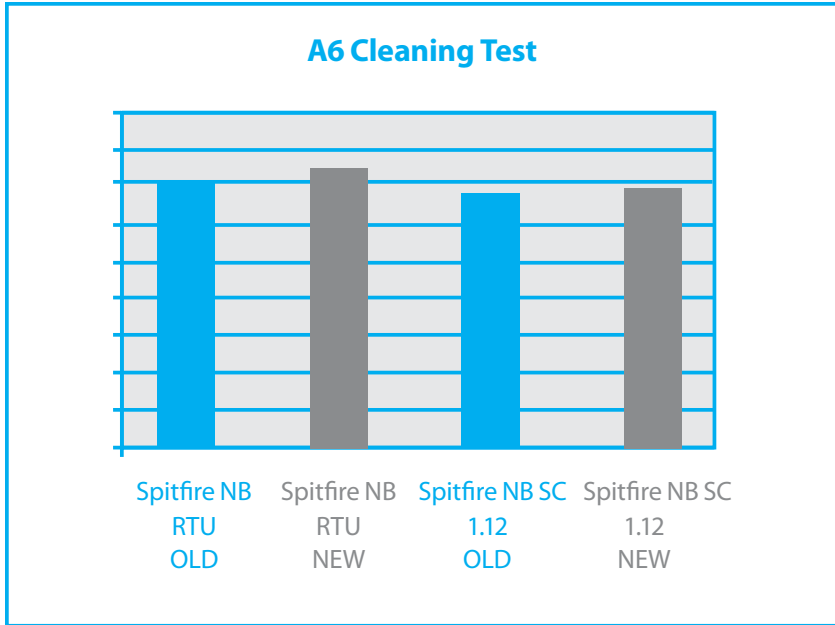

Figure 1. A6 cleaning performance of non-butyl Power cleaners. All cleaners had equal or better performance than the controls.

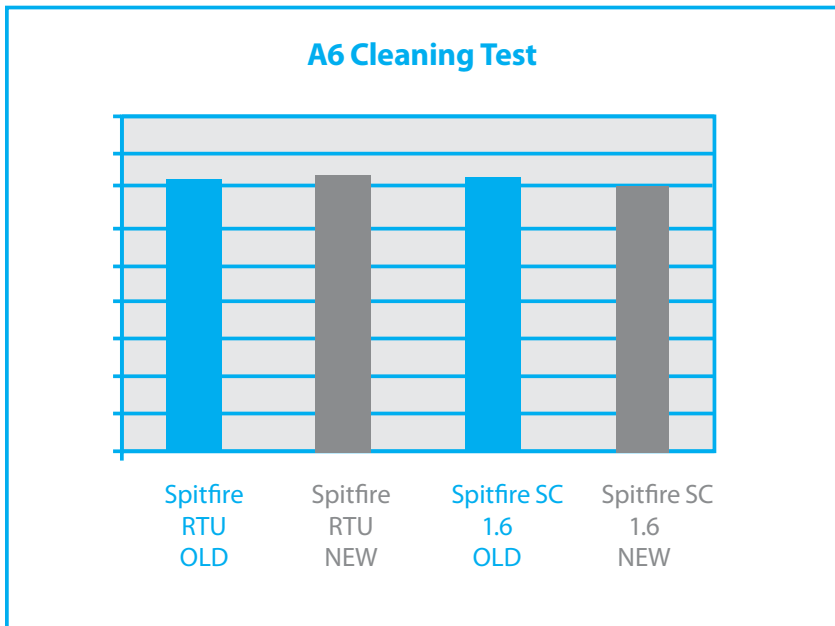

Figure 2. A6 cleaning performance of butyl Power cleaners. All cleaners had equal or better performance than the controls. 1102W102-1 statistically was lower than the control but there was no visual difference between the tiles.
