

SAVE WATER. SAVE MONEY.

ZERO FLUSH
ZERO WATER URINALS

TimeMist[®]
Fresh Thinking[™]

Conserve Water... it's Precious

Facts...

- The average swimming pool has 15,000 gallons of water.
- ONE ZeroFlush Urinal can save 3 swimming pools worth of water in just one year.
- ONE ZeroFlush urinal will pay off in less than a year with savings on water, sewage and maintenance costs.
- Unlike competitors, our Odor Barrier Oil is 100% bio-degradable and will not break down when using the strongest cleaning agents.
- ZeroFlush urinals are environmentally friendly and help reduce the growing amount of sewage to save our already heavily taxed municipal waste water infrastructure.

Models...

OUR SLEEK MODERN DESIGNS HELP REDUCE SPLASH AND KEEP FLOORS DRIER.

Model 101
38-3084ZF

Model 201
38-3085ZF

Model 501
38-3088ZF

ALL MODELS INCLUDE...

- Mounting Hardware
- Wall Bracket
- Drain Flange Coupler
- Odor Barrier Liquid
- Insert Key
- Installation Instructions
- Drain Insert
- Maintenance Instructions

REPLACEMENT KIT INCLUDES...

- 2 - Drain Inserts
- 2 - Insert Removal Tools
- 2 - Odor Barrier Oil*

* Chemical free and 100% environmentally friendly

Odor Barrier Replacement Kit
38-3087KIT

How it works...

1. Install drain insert
2. Trap complete
3. Add water followed by all natural odor barrier
4. Trap ready for use
5. First use
6. Ongoing use

No More...

- Odors
- Difficult installations
- Leaky valves
- Urinal cakes
- Wasteful flushing

Reduce...

Maintenance, water & sewer costs

Cleaning & Insert Maintenance

Regular Cleaning

As with any other urinal (water & no water), ZeroFlush urinals should be cleaned on a regular basis. Simply spray any non-abrasive agent on the urinal and wipe clean. No more scrubbing or harmful chemicals.

Insert Replacement

- A. Remove the drain insert with the tool provided. Any remaining odor sealer fluid and any urine inside the waste trap will automatically flush away down the waste pipe.
- B. Rinse the waste line with a bucket of water.
- C. Install new drain insert into the housing.
- D. Add 32 oz. of water.
- E. Pour in odor sealer fluid through the drain insert and the urinal is ready for use.

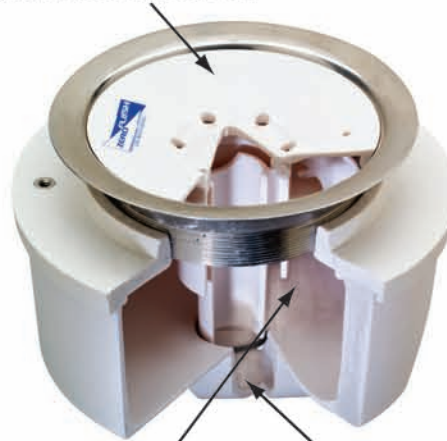

At no time will the person replacing the odor sealer fluid come in contact with urine.

THE ZEROFLUSH INSERT IS FOUR TIMES LARGER THAN THE COMPETITION, SO THERE ARE LESS REPLACEMENTS AND LONGER USAGE

ZeroFlush™ Housing Unit

Insert is removable by pulling upward with removal tool.

Larger passageway allows fluid to flow without build-up.

When the insert is removed, fluids travel down the drain pipe.

Competitor Housing Unit

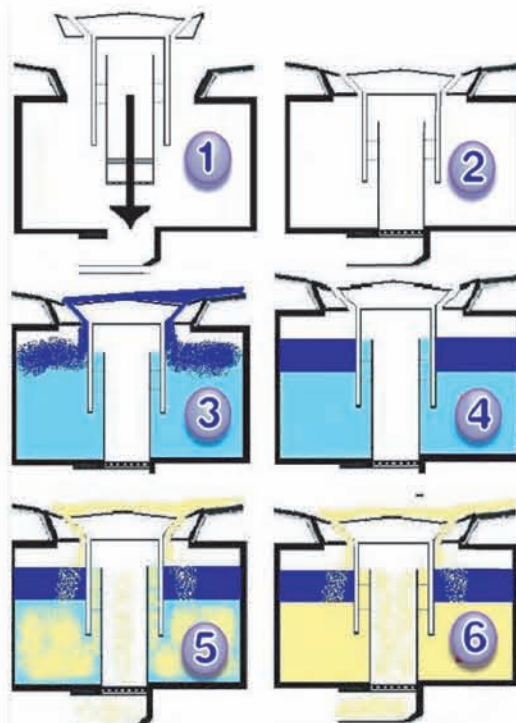

The entire housing unit is removed; Sediment and urine are trapped inside.

Note narrow passageway.

The ZeroFlush™ housing unit is the largest on the market. The space allows for fluid to travel through without sediment build-up and clogging.

Competitor housing units are smaller, and the passageway for fluid is narrow. This allows for sediment to build up, and can cause clogging.

After approximately 15,000 uses, blue drops of Odor Barrier Oil will appear on the insert cover. This indicates it's time to replace the insert and Odor Barrier Oil.

Model Specifications

All Urinals are ADA compliant 

Model 101 Specifications:

Dimensions: 19"W x 28"H x 15.5"D
Rough-In: For 24" lip height, drain center line must be 17" from floor
Approx. Weight: 60 lbs.
Color: White, Vitreous China
Item No.: 38-3084ZF

Model 201 Specifications:

Dimensions: 15.9"W x 24.8"H x 15.5"D
Rough-In: For 24" lip height, drain center line must be 17" from floor
Approx. Weight: 40 lbs.
Color: White, Vitreous China
Item No.: 38-3085ZF

Model 501 Specifications:

Dimensions: 13.25"W x 19.5"H x 13"D
Rough-In: For 24" lip height, drain center line must be 17" from floor
Approx. Weight: 30 lbs.
Color: White, Vitreous China
Item No.: 38-3088ZF
