

JonCrete™/MC

Concrete and Floor Restorer

A powerful, fast acting formula that restores the appearance of concrete, tile and grout by removing deep soils and stains.

Brightens & Enhances

- ▶ Deeply penetrates to remove soil
- ▶ Rejuvenates the look of the floor

Versatile Problem Solver

- ▶ Removes dirt and oil from concrete
- ▶ Deep cleans floor tile and grout
- ▶ Not regulated as hazardous waste for disposal under EPA Resource Conservation and Recovery Act (RCRA) or Environment Canada regulations

Easy to Use

- ▶ Ready-to-use formula; no mixing
- ▶ No specialized equipment required
- ▶ Apply with mop

Designed For

- ▶ Healthcare
 - ▶ Food Service
 - ▶ Education
 - ▶ Retail
 - ▶ BSC
 - ▶ Lodging
 - ▶ Government
-

Use Overview

JonCrete™/MC Concrete and Floor Restorer is a fast-acting formula that restores and rejuvenates the appearance of concrete floors, floor tile and grout. **JonCrete™/MC Concrete and Floor Restorer** when used as part of a comprehensive concrete care program will brighten and lighten the surface of your concrete floor.

Routinely use **JonCrete™/MC Concrete and Floor Restorer** to deep clean floor tile and restore grout to its original appearance.

- ▶ Use appropriate personal protective equipment. For best results, this product should be used undiluted.
- ▶ Blockade areas to be restored. Floors will become very slippery when restorer is applied. Exercise caution.
- ▶ Apply generous amounts of solution uniformly to tile, grout or concrete floor with a mop. If splashing occurs, wipe-off surfaces with a clean rag dampened with water.
- ▶ Let solution soak for 5–10 minutes, depending on severity of soiling. Re-wet as necessary. Do not allow the solution to dry on the floor. A repeat of Step 3 and Step 4 may be necessary to achieve a desired look on floors that have extreme build-up of dirt or grease. For concrete floors that have been previously sealed, use a Diversey stripper to remove any existing sealer prior to Step 3.
- ▶ Hand or machine scrub thoroughly using coarse scrub brush, stripping brush, or black pads.
- ▶ Pick-up all of the solution with a clean mop, wet vac or autoscrubber.
- ▶ Thoroughly rinse the floor with clean water twice, using a mop and bucket or autoscrubber. **Note:** It is important to rinse solution thoroughly before applying a sealer to concrete floors.
- ▶ Let concrete floors dry completely before applying appropriate JonCrete™/MC Concrete Sealer. For tiled floors, seal grout with Impermo™/MC II Water Based Penetrating Sealer.

Note: Not for use on surface colored or acid dyed concrete floors.

JonCrete™/MC Concrete and Floor Restorer meets the newest and most stringent VOC standards in North America, including those adopted by the California Air Resources Board (CARB).

Product Specifications

Description	
Color/Form	Clear colorless liquid
pH	11.5
Scent	Fresh
Specific Gravity	1.037

Hazard Rating

HMIS		NFPA
3	Health	3
0	Flammability	0
0	Reactivity	0

4=Very High; 3=High; 2=Moderate; 1=Slight; 0=Insignificant.
