**High Impact
On Your Table...**

**Low Impact On
The Environment**

CHAMPWare™

ChampWare products are naturally sourced using bagasse, a fibrous by-product of the sugarcane refining process.

Sugarcane is a renewable resource, continually being replanted and grown.

Since bagasse is a by-product, no food sources are depleted in its manufacture.

Sugarcane refineries often use agricultural waste as a source of bio-fuel, greatly reducing or eliminating the need for fossil fuels in the creation of bagasse fiber.

ChampWare products offer a responsible solution to your tableware needs. This premium product line consists of plates, bowls, platters, trays, and clamshells.

ChampWare is plastic free, coating free, and totally chlorine free.

An FDA approved additive is used to ensure the greatest amount of moisture and grease resistance. When composted, this additive creates no soil polluting by-products.

ChampWare foodservice products are a part of our SCT Green Initiative.

ChampWare is compostable in commercial composting facilities and in some home composting piles.

Given the proper environment, ChampWare items will fully biodegrade within a reasonably short period of time.

ChampWare is recyclable in the limited areas where facilities exist.

All ChampWare items meet the following standards:

For compostability
ASTMD-6400
ASTMD-6868

For environmentally friendly disposable food packaging
GB18006.1-1999.

 This paper contains recycled materials.

The ChampWare line consists of high quality, durable foodservice products. ChampWare is microwaveable, and grease and moisture resistant, which makes it the perfect option for any occasion. All items are made of bagasse, a sugarcane by-product, and are free of plastic, chlorine and coatings. Given the right environment ChampWare products are biodegradable. All ChampWare items are recyclable and compostable where facilities exist.
