RENEWABLE RESOURCES

FEATURING

Eco-Forward® single-use products for the foodservice industry

GOOD FOR BUSINESS. GOOD FOR EVERYONE.

COMPOSTABLE¹, RECYCLED CONTENT, RENEWABLE RESOURCES

Solo Foodservice is committed to making a positive difference to the environment, offering a full portfolio of Eco-Forward® products with various environmental attributes. Solo will continue to bring single-use packaging innovations to the marketplace utilizing sustainability criteria that meets or exceeds Solo's high standards of product function, quality and reliability.

Solo demonstrates a commitment to the environment by working toward sustainable solutions that optimize the use of recycled, recyclable, compostable or renewable resource materials. Initiatives and programs to reduce our environmental footprint and those of the products we make cross all of our operations and functions.

Eco-Forward® Product Requirements

RENEWABLE RESOURCES

A naturally occurring resource that can replenish itself naturally. They include corn, bagasse and trees.

POST-CONSUMER RECYCLED CONTENT

Supporting the use of post-consumer recycled content is a key tenet of Solo's Eco-Forward® platform. Requiring post-consumer recycled materials, instead of post industrial sources, encourages consumer recycling and creates market demand for consumer recycled materials. Solo's Eco-Forward® offering includes products made with recycled PET water bottles and containers and paper collected from offices and school recycling programs.

COMPOSTABLE¹

In a number of communities, compostable products are the preferred environmental choice. Solo's products identified as compostable meet the ASTM-D6868 or D6400 standard for compostability and are fully compostable in a commercial compost facility.

To find a composter in your area, go to findacomposter.com

Material Profiles

Poly-lactic Acid (PLA)

A material made from plant-based renewable resources.

Single-Sided Poly-lactic Acid (SSPLA)

A material made from plant-based renewable resources that is applied to a single side of a PLA container, providing additional heat tolerance.

Bagasse (Sugarcane)

A fiber material made from used sugarcane stalks, which is a renewable resource.

Post-Consumer Recycled Content PETE Plastic (RPET)

Recycled plastic used from water bottles and other containers after consumer use.

Post-Consumer Recycled Content Fiber (PCF)

Paper fiber that has been recovered and recycled after consumer use.

Bare® by Solo® Brand

Solo is **B**ringing **A**lternative **R**esources for the **E**nvironment with a broad environmental platform. Bare® by Solo offers a large breadth of Eco-Forward® single-use cup, dinnerware and food container solutions to meet every packaging need. Bare® by Solo can accommodate operators needs with a variety of neutral colors and complementary prints, by providing an assortment of mix-and-match options to compliment any décor or occasion.

¹Through independent testing, Solo confirmed that these products meet the ASTM standard for compostability. This means Solo's products are compostable in those areas where commercial compost facilities exist. Commercial composting facilities may not exist in your area, so please check with your local municipality.

Paper Dinnerware

COMPOSTABLE
RENEWABLE RESOURCES

FEATURES & BENEFITS

- Made from 100% plant-based renewable resources
- ASTM-D6868 certified
- Compostable in a commercial compost facility
- Cedar Grove compost facility accepted
- Cost efficient/economical
- Paperboard that is from a Forest Stewardship Council (FSC) or Sustainable Forestry Initiative (SFI) certified fiber source
- Available in three geometries:
 - Deep-well:** great for heavy, saucy foods like steak and potatoes
 - Standard-well:** perfect for oversized meals like pizza and salads
 - Shallow:** ideal for light foods and sandwiches
- Available in Symphony™ and Bare® prints or solid white color
- Custom print capabilities
