Re: Victoria Bay #1 Lemon Scent Disinfectant USDA Certification
(S00001)

To Whom It May Concern:

As you may be aware, USDA no longer offers a program of product authorization and classification. Chemical manufacturers may now self-certify their products.

This is to certify that this product was developed and is manufactured with consideration for the USDA "Guidelines for Obtaining Authorization of Compounds to be used in Meat and Poultry Plants." This product meets the requirements of 9CFR Section 416.4(c).

This product is safe and effective for use in inedible product processing areas, nonprocessing areas, and/or exterior areas of official establishments operating under the Federal meat, poultry, shell egg grading and egg products inspection programs when used according to label directions provided that it is not used to mask odors resulting from insanitary conditions, and that any characteristic odor or fragrance does not penetrate into edible product area. (formerly USDA Classification C1.)

Permission for the use of this compound on loading docks and other similar areas is left to the discretion of the inspector in charge of the establishment.

Sincerely,

A handwritten signature in cursive script that reads "Courtney Cosner".
