

# CLAUSEN CARPET SOLUTIONS

## ENZYMAGIC FOUL ODOR AND STAIN REMOVER FOR CARPETS, RUGS, UPHOLSTERY, ETC.

**WORKS NATURE'S WAY BY  
ENZYMATIC ACTION**

**WORKS IMMEDIATELY TO  
ERASE ODORS**

**SAFE FOR PERSONNEL  
AND ON SURFACES**

**MULTI-USE-WHEREVER  
THERE'S FOUL ODOR**

### DESCRIPTION

It works like magic to erase stains and odors without solvents, harsh chemicals or hard scrubbing. Enzymatic literally eats and digests organic matter nature's way, by bio enzymatic action. Each quart of Enzymagic contains 50 billion enzyme producers chosen for their appetite for the organic matter that causes stains and odors that are not removed by typical spotters.

### USES

For removal of stains and odors from incontinence, sickness, pet accidents, blood, spilled food and drinks in carpet, upholstery, table linen, bedding, clothing... and around toilets, urinals, etc.

### HOW TO USE

**INITIAL CLEAN UP** - The sooner started, the better. **1)** Scrape up or otherwise remove gross soil. **2)** Use first as a cleaner. Dilute with four parts water. Apply with brush, cloth or sponge to remove remaining soil.

**NOTE** - Enzymes are generally safe to use on any surface not harmed by soap and water including stain resistant nylon carpeting.

**TREATMENT** - **1)** Spray solution to saturate problem area. If contamination has reached padding, use enough to penetrate to that depth. **2)** Once saturated, blot with clean towel to absorb excess. **3)** For large areas dilute product 1:4 with water and apply with extraction machine. Maintain moisture with wet towels and plastic. Keep area moist until odor and stain are gone (8 to 24 hours). Covering with plastic sheet will retard drying and sustain action. If odors reoccur, repeat. For grease, tar and oil-based stains use GTO Spotter. Also destroys odors in and around urinals, drains and traps.

*(May be applied to large areas through carpet extractor machine).*

### PACKAGING

Available in quarts & gallons

### BENEFITS

**WORKS NATURE'S WAY, BUT FASTER** - Bio enzymatic action liquifies, then digests organic matter without need for solvents, harsh chemicals or hard scrubbing.

**OVER 12 BILLION ENZYME PRODUCERS PER QUART** - Chosen and blended especially to eat and digest organic matter that develops stain and odors.

**WORKS IMMEDIATELY TO ERASE ODORS** - Contains a proven odor counteractant that starts to eliminate odors in the air even as the enzymes are developing.

**SAFE ON ALL SURFACES** - Enzymagic is neutral in pH and contains no solvents. Will not harm any colorfast textile, leather or plastic.

**SAFE FOR PERSONNEL** - The only products from the bioenzymatic action of the product are the creation of: **1)** Carbon dioxide (needed by vegetation), **2)** Water and **3)** More enzymes.

**EASY TO USE** - Just apply to problem areas and allow to stand. No need for scrubbing or rubbing.

**LONG SHELF LIFE** - The safe bacteria in Enzymagic lay dormant in the container until the product is used.

### SPECIFICATIONS

APPEARANCE.....white opaque liquid  
ODOR.....pleasant  
pH.....6.80±0.5  
FLASH POINT.....none to boiling  
BOILING POINT.....near 212° F  
SELF LIFE.....one year minimum

### DISTRIBUTED BY:
