Re: Victoria Bay Heavy Duty Delimer USDA Certification
(K01067 / K01079)

To Whom It May Concern:

As you may be aware, USDA no longer offers a program of product authorization and classification. Chemical manufacturers may now self-certify their products.

This is to certify that this product was developed and is manufactured with consideration for the USDA "Guidelines for Obtaining Authorization of Compounds to be used in Meat and Poultry Plants." This product meets the requirements of 9CFR Section 416.4(c).

This product is safe and effective for use as an acid cleaner in all departments of official establishments operating under the Federal meat, poultry, shell egg grading, and egg products inspection programs. (formerly USDA Classification A3)

Before using this compound, food products and packaging materials must be removed from the room or carefully protected. After using this compound, surfaces must be thoroughly rinsed with potable water.

Sincerely,

A handwritten signature in cursive script that reads "Courtney Cosner".
